

# Transportation

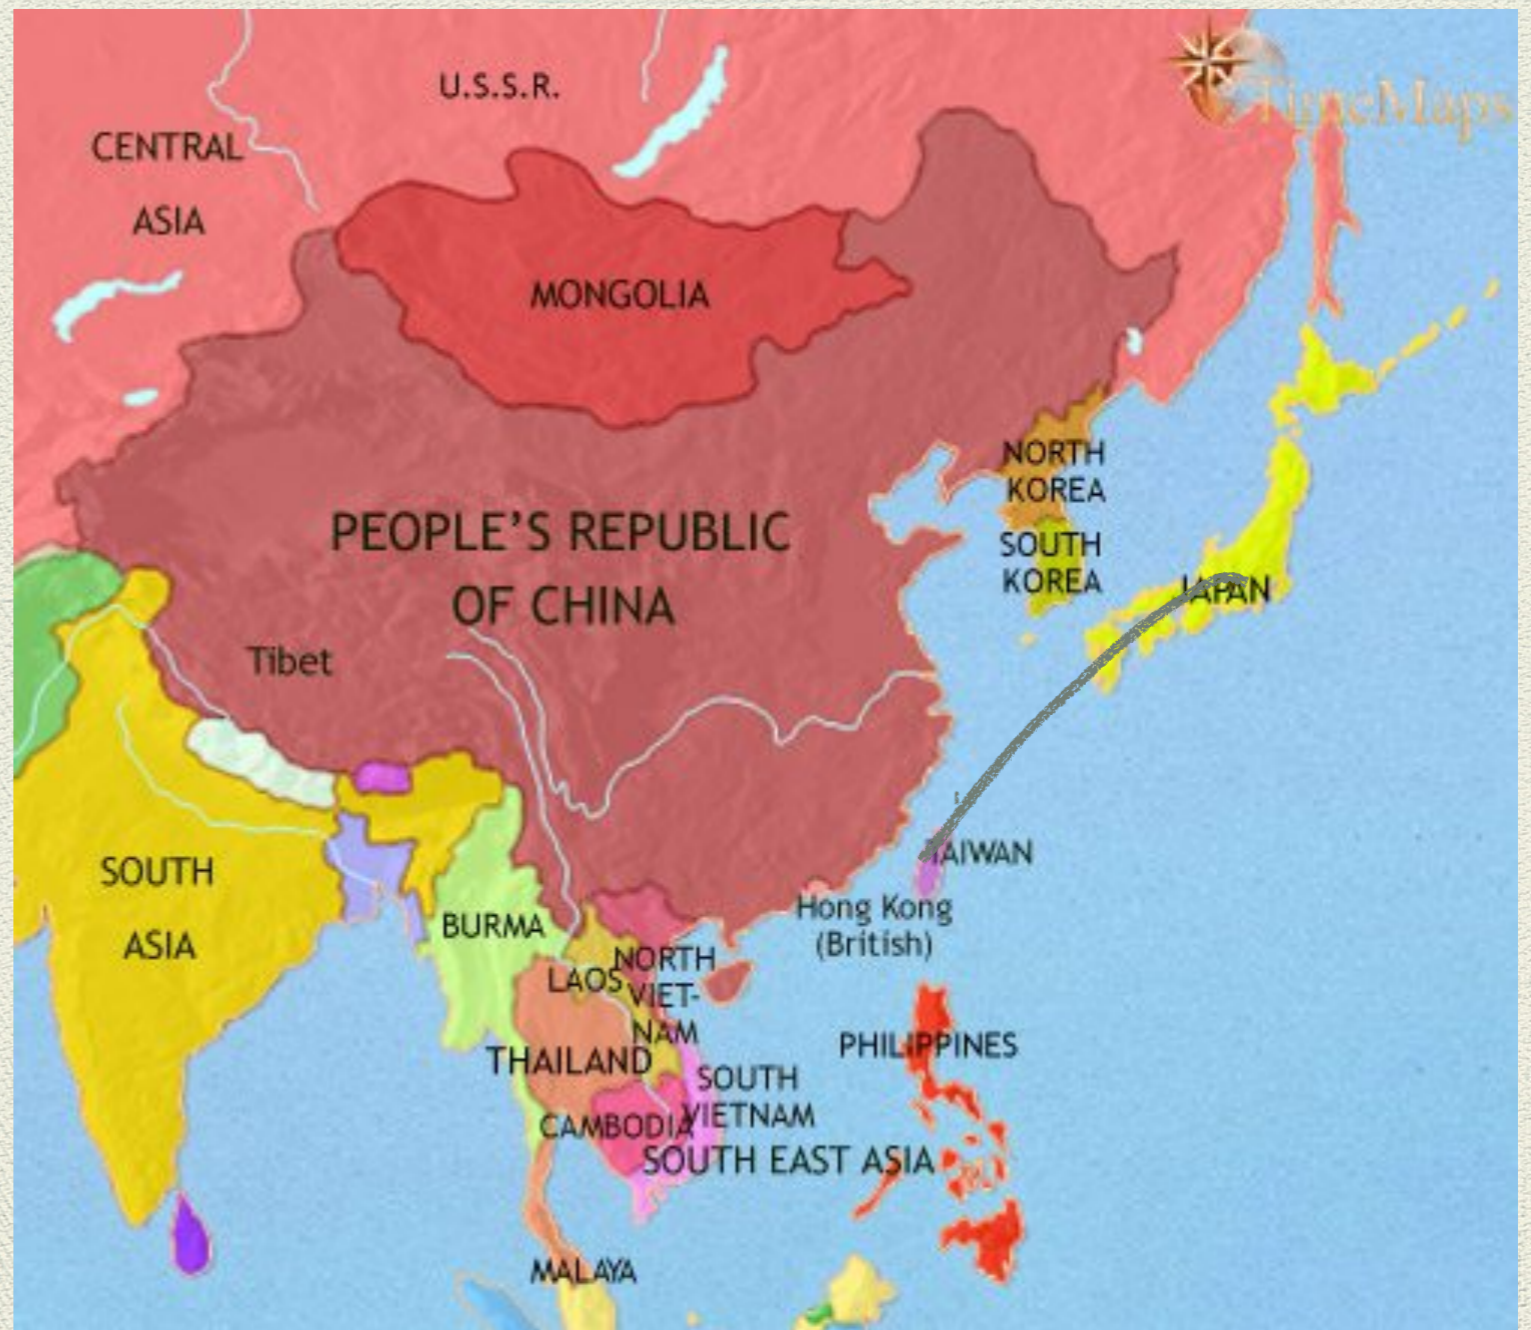

By Amy

Getting from here, to there. Going from point A, to point B. How do you get to school? How does your father get to work? Some people ride a bicycle or a motorcycle, or drive a car, or take a taxi, or take a bus. We all use at least one kind of TRANSPORTATION.

*By Amy*

My speech is about which types of transportation I would use to travel from Taichung to Hokkaido, Japan and then back to Taichung.

Starting my journey, I pack my bags and call a taxi to pick me up from my house and take me to the Taichung airport. I take a flight to Hokkaido.

When I arrived in Hokkaido, I took a limousine to the Rusutsu ski resorts. I signed up for several activities on my vacation. After settling in, I rented a snowmobile and explored the area surrounding the resort. It was cold and exciting to ride the snowmobile!

My hotel suite was very luxurious and comfortable. I went skiing and snowboarding every day for ten days! The ski resort had over twenty ski slopes and several ski lifts and a gondola. I ate at the three main resort restaurants. The cuisine was delicious!

My muscles were very tired and sore after spending so much time on the ski slopes. On my last day, I just walked around the resort taking pictures and saying good bye to all the new friends I made. I took the limousine back to the Hokkaido airport and caught a flight back to Taiwan. My journey to Hokkaido was incredible, and made possible by using many types of transportation.

Thanks for listening to my speech!
