

*Getting from here, to there. Going from point A, to point B. How do you get to school? How does your father get to work? Some people ride a bike, or ride a motorcycle, or drive a car, or take a taxi, or take a bus. We all use at least one kind of **TRANSPORTATION.***

*By  
Cody*

*My speech is about which types of transportation I would use to travel from Taichung to Brisbane Australia, and then back to Taichung.*

*Starting my journey, I packed my bags and called a taxi. The taxi picked me up from my house, and took me to the Taichung High Speed Train station. I bought a ticket, and took the HSR to the Taoyuan HSR station. From there, I got on the shuttle bus, and took the shuttle bus to the Taoyuan International Airport. So far, I had used three kinds of transportation. 1. A taxi 2. The High Speed train 3. The Airport shuttle bus.*

---

*1. A taxi*

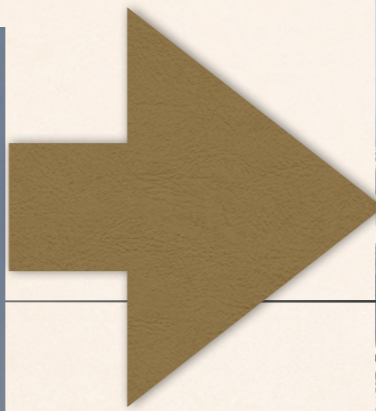

*2. High Speed train*

*3. Airport shuttle bus.*

*Now that I was at the airport, my trip was really beginning! I took a flight to Hong Kong, and changed planes. Then I took a flight all the way to Brisbane, Australia! My uncle lives in Brisbane, so he picked me up at the airport and drove me to his house near the beach.*

*My uncle lives a mile from the beach, so he let me use his bike to go to the beach. I also borrowed his surfboard and surfboard trailer! I rode to the beach and surfed every day of my vacation. I even had the opportunity to rent a Hobycat sailboat, and sailed a few kilometers offshore!*

*After spending a week at my uncles' house, it was time for me to end my holiday. My uncle drove me back to the airport and told me that I was an invisible guest, the best kind of guest. He said that I was no trouble at all and that I was welcome to visit him again. I caught a flight back to Taiwan, and my dad picked me up at the airport and drove me home. I used many types of transportation on my journey, and I look forward to doing it again!*

*I hope that you enjoyed my speech about transportation, good night!*
