

# Pet dogs

By: Sophia Hsiao 🐾

## *History of Dogs*

*Dogs are the oldest pet that humans have made friendly. Once wolves, over thousands of years we have changed them to be more friendly and useful for humans. Dogs have 4 legs allowing them to run very fast.*

# Dog Breeds

Dogs come in a huge variety. Some breeds, such as Beagles or border Collies, are designed to carry out specific jobs, and their bodies have been altered to best achieve that.

## Dog Food

Dogs are carnivores and require a meat-based diet, although natural plants are sometimes good for them. My dog like to eat small bones.

# Dogs Appearance

Dogs have 4 legs allowing them to run at very fast speeds. They have powerful jaws that can either gently carry things, or bite with great power.

# Dogs Image

Dogs are often seen as symbols of loyalty and protection.

Many films have a dog as a stupid, but very lovable creature who is eager to please and quick to show love.

# Dog jobs

One of the oldest jobs for dogs is as sheepdogs. Their speed and ability to learn let them work with Shepherds controlling sheep.

# *My dog*

My dog is very cute so a lot of time I will play with my dog. My sister thinks my dog is our ancestor or was someone very important. My dog is a girl.

Thank you for listening to my presentation on dogs 🐶.
