Godzilla

WHO IS GODZILLA?

Godzilla was a big monster from the Godzilla movie. Godzilla lived in the ocean under a volcano. The army found it and tried to kill it by dropping a nuclear bomb. However, it didn't kill it but made it stronger.

GODZILLA'S POWERS

Its trademark attack is his “ray”, which is capable of devastating roughly one quarter of Tokyo in a single blast. A not so well known ability is to project a field of nuclear energy from its body which is called a nuclear pulse.

ANOTHER POWER OF GODZILLA

It can make fire come out of its mouth, tail and back. This power can burn down the city and kill all the people.

Who is Monster Zero?

Monster Zero came to Earth a long time ago. It fell in the ice and slept for thousands and thousands of years. Monster Zero wants to govern the Earth by killing all the other monsters like Godzilla.

MONSTER ZERO POWERS

Monster Zero has many different powers, like it can shoot electricity out of its mouth. It can eat electricity and open its wings. When it growls at the sky electricity will come out of its body and wings. This is how it fights Godzilla.

GOODBYE

A long-exposure photograph of a night highway. The sky is dark blue and filled with many small, bright stars. In the foreground, there are several parallel light trails in shades of red, orange, and yellow, stretching from the left towards the right. The background shows dark, silhouetted hills and a utility pole on the right side. The overall scene is a quiet, starry night landscape.
